Summary

Software developer with a strong foundation in Python and experience building desktop applications. Skilled in translating requirements into efficient, maintainable code and capable of managing projects independently. Familiar with AI concepts and problem-solving, with a demonstrated ability to learn and apply technical skills in software development and algorithmic solutions.

Professional Experience

Software Developer

NanoMagnetics Instruments – Ankara, Turkey | 11/2023 – Present

- Developed three Python desktop applications replacing legacy LabVIEW systems, improving efficiency and maintainability
- Gathered and implemented user feedback to enhance functionality and usability
- Managed full software development lifecycle independently, from design to deployment

Systems Engineer

NanoMagnetics Instruments – Ankara, Turkey | 01/2023 – 11/2023

- Analyzed complex measurement systems to support software integration and development
- Prepared technical documentation and calibration procedures to ensure system reliability

Volunteer Assistant

Patika.dev – Remote | 05/2022 – 01/2023

- Solved weekly Python coding challenges, refining algorithmic and problem-solving skills
 - Guided beginners in understanding technical concepts and solving programming problems
-

Education

Geological Engineering

Middle East Technical University – Ankara, Turkey | 09/2014 – 07/2023
